

VILLAGE OF CHESTNUT RIDGE  
LOCAL LAW NO. **x** OF 2021  
A LOCAL LAW AMENDING CHAPTER 195, ZONING,  
TO ADJUST THE DEFINITIONS OF BASEMENT, CELLAR, GROSS FLOOR AREA,  
HEIGHT AND STORY;  
TO ADD DEFINITIONS OF FIRST FLOOR, GRADE PLANE, AND STORY ABOVE GRADE;  
AND TO EXEMPT CERTAIN BASEMENT AND GARAGE AREAS FROM CALCULATIONS OF  
FLOOR AREA RATIO

Be it enacted by the Village Board of Trustees of the Village of Chestnut Ridge by authority of Article 7 of the Village Law and Article 2, Section 10 of the Municipal Home Rule Law, as follows:

*(Note: Proposed insertions of language into the Code are indicated by underlining. Proposed deletions of language from the Code are indicated by strikeout symbols. All other language shown is to remain unchanged. The symbol “\* \* \* \*” indicates portions of the Code to remain unchanged, which are not shown here for brevity.)*

**Section 1: Legislative findings and intent. The Village Board of the Village of Chestnut Ridge hereby finds and declares:**

1. The Village periodically reviews its Zoning Code to ensure that the various provisions continue to effectively implement the Purposes of the Code set forth in Section 290-3:
  - A. *The Village's environmental resources are limited; the protection and enhancement of environmental, human and community resources must be fully respected.*
  - B. *The impacts of growth must be controlled to maintain the rural, semirural, and suburban character of the Village consistent with the ability of the Village to provide facilities and services.*
  - C. *Commercial development must not be permitted to cause adverse impacts on the circulation facilities and on community appearance and should meet locally generated needs.*
  - D. *Public facilities and services, including roads, drainage, and recreation, must be planned and implemented consistent with the ability of the community to fund such facilities and the need to provide for an expanded population and not as a response to incremental and disjointed growth.*
  - E. *Housing and employment opportunities should be broadened to the extent possible, by encouraging a wider variety of housing units and employment-producing land uses.*
  - F. *A greater role for the public must be encouraged, both at the community level for policy implementation and at the neighborhood level for land use implementation.*

The Village identified certain definitions in the Zoning Code that require modification in order to effectuate these policies.

2. Changed economic conditions, an influx of residents with larger families, an influx of residents that choose to live with extended families, and real estate market trends since 2017, when definitions were last adjusted, have led to a demand from Village residents to build larger structures than are permitted under the current zoning restrictions.

3. Current zoning restrictions and definitions are such that any below-grade spaces that meet building code requirements for habitability effectively count toward Floor Area Ratio (FAR) restrictions, which prescribe a maximum floor area of all structures on a lot as a function of the lot area of the site multiplied by a percentage and which is intended to prevent incompatibly-sized residential structures within neighborhoods, and to require larger structures be located on larger lots.
4. The Village Board finds that current FAR standards allow structures that are already at the maximum size that can reasonably be anticipated to be compatible with the character of existing neighborhoods.
5. If designed appropriately, residential floor area located below grade will not be evident from surrounding properties. In order to accommodate Village residents choosing to live with larger households, it is believed that allowing habitable, below-grade spaces that do not count toward FAR standards will allow for larger living spaces without impacting the look of residential structures.
6. The Village Board further finds that below-grade spaces may be developed with ceiling heights of seven feet or greater, the minimum required height for habitability under State-mandated building codes, without any appreciable impact on the character or aesthetics of Chestnut Ridge residential areas, so long as certain controls are implemented that prevent grades from being manipulated in a way that will lead to awkwardly appearing sites and structures.

**Section 2: Amend Chapter 290, Zoning, §290-116 Definitions, by modifying existing definitions or adding new definitions in alphabetical order, as follows:**

§ 290-116 Definitions.

As used in the chapter, the following terms shall have the meanings indicated:

\* \* \* \* \*

**BASEMENT**

~~That portion of a building which is partly underground, but which has at least 50% of its interior height, measured from floor to ceiling, above the average finished grade of the ground adjoining the building. A story that is not a story above grade.~~

\* \* \* \* \*

**CELLAR**

~~That portion of a building which is partly (or wholly) underground, but which has less than 50% of its interior height, measured from floor to ceiling, above the average finished grade of the ground adjoining the building. See basement.-~~

\* \* \* \* \*

#### FLOOR AREA RATIO (FAR)

The gross floor area of all buildings on a lot divided by the gross area of the lot, as adjusted pursuant to 290-26.

\* \* \* \* \*

#### GRADE PLANE

A reference plane representing the average of finished ground level adjoining the building at exterior walls. Where the finished ground level slopes away from the exterior walls, the reference plane shall be established by the average of the lowest points within the area between the building and the lot line or, where the lot line is more than 6 feet from the building, between the building and a point 6 feet from the building.

#### GROSS FLOOR AREA

- A. The sum of the gross horizontal area of every floor of a building, measured from the exterior faces of exterior walls or from the center line of party walls separating the two buildings, including:
- (1) Basement space, except as exempted for FAR purposes pursuant to §290-26.
  - (2) Attic space, whether or not a floor has been laid, over which there is structural headroom of six feet three inches or more.
  - (3) Roofed porches, and breezeways ~~and garages~~.
  - (4) Garages, except as exempted for FAR purposes pursuant to §290-26.
  - ~~(4) Cellar space with more than six feet three inches in height.~~
- B. Regardless of the internal arrangement of a building, it shall be deemed to have at least one floor for each 20 feet of height or a major fraction thereof. However, a floor area does not include:
- (1) Terraces, unroofed open porches, and steps.
  - (2) Interior loading berths.
  - (3) Crawl space.

\* \* \* \* \*

#### HEIGHT

The vertical distance from the ~~average elevation of the proposed finished grade along all walls of a building (or adjacent to all sides of a nonbuilding use) grade plane~~ to the highest point of the roof for flat roofs and to the mean height between eaves and ridge for gable, hip and gambrel roofs of such building (or nonbuilding uses), except as specifically exempted in Article VI, § 290-21.

\* \* \* \* \*

#### STORY

That part of any building, ~~exclusive of including~~ cellars ~~but inclusive of and~~ basements, comprised

between the level of one finished floor and the level of the next higher finished floor or, if there is no higher finished floor, then that part of the building comprised between the level of the highest finished floor and the top of the roof beams. Each 10 feet or fraction thereof of height shall be deemed a story in absence of finished floors. A crawl space does not count as a story.

\* \* \* \* \*

#### STORY ABOVE GRADE

Any story having its finished floor surface entirely above grade plane, or in which the finished surface of the floor next above is (1) more than 6 feet above grade plane; or (2) in which the finished surface of the floor next above is more than 12 feet above the finished ground level at any point.

\* \* \* \* \*

*Section 3: Amend Chapter 290, Zoning, §290-26 Supplementary Regulations, as follows:*

**§ 290-26 Modified floor area ratio requirement for ~~single~~one-family detached residences with basements with deep cellars.**

The following areas shall not be counted toward gross floor area when calculating Floor Area Ratio for one-family detached residences. Where a single family detached home is proposed to be constructed with a cellar in an R-35, R-25, or R-15 zoning district, the Building Inspector shall increase the maximum required floor area ratio by 0.05 if the following conditions are met:

- A. Up to 500 square feet of unheated garage area, used for storage of automobiles and other goods and equipment customarily stored in a one-family residential garage. The cellar must be contained entirely within the first floor footprint;
- B. That portion of a basement located below a story above grade, except that the basement area exempted from FAR calculation shall not exceed 40% of the total gross floor area. The cellar ceiling must at no point be more than three feet above finished grade of the ground adjoining the building, and the first floor elevation must at no point be more than four feet above finished grade of the ground adjoining the building, except that the installation of window wells and exterior stairwells is permitted so long as the finished grade of the ground adjoining the window wells and stairwells is no more than three feet lower than the ceiling of the basement at any point;
- C. The average finished grade adjoining the building may be no more than five feet higher than the lowest curb elevation adjoining the lot; , at any point
- D. The first floor of the residence must not contain more than 40% of the total gross floor area of the building; and
- E. Any floor area in a structure added pursuant to the provisions of this section must fully comply with the provisions of the New York State Uniform Fire Prevention and Building Code

\* \* \* \* \*

*Section 4: Separability. If any section, subsection, clause, or provision of this Local Law shall be*

|

*deemed by any court of competent jurisdiction to be unconstitutional, ineffective, or otherwise legally invalid or unenforceable, in whole or in part, to the extent that it is not unconstitutional, ineffective, or otherwise legally invalid or unenforceable, it shall be valid and effective and no other section, subsection, clause or provision shall, on account thereof, be deemed invalid or ineffective.*

*Section 5: This local law shall take effect immediately upon filing with the Secretary of State.*

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

Project :

Date :

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

***Full Environmental Assessment Form***  
***Part 3 - Evaluation of the Magnitude and Importance of Project Impacts***  
***and***  
***Determination of Significance***

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

**Determination of Significance - Type 1 and Unlisted Actions**

SEQR Status: ☐ Type 1 ☐ Unlisted

Identify portions of EAF completed for this Project: ☐ Part 1 ☐ Part 2 ☐ Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the \_\_\_\_\_ as lead agency that:

☐ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
